

Mediterranean Skylines & Floodplains- Cities & Nature

ISALA Conference Tel Aviv 2019

Global climate change and coping with extreme disruptive natural events has become one of the main issues on the front of planning and design. These challenges require innovative thinking and creative solutions for resilient and sustainable cities and communities.

This year, the Israeli Association of Landscape Architects is honored to host the IFLA Mediterranean annual meeting. The key challenge the med-net identified this year is Resiliency and green infrastructure strategies and solutions for stormwater management. Delegates from 9 countries in the Mediterranean Basin that are facing similar challenges. will participate in this conference and share from their experiences.

The conference will host experts, policy makers, landscape architects, etc. that will share from their experiences with groundbreaking projects from Israel, alongside participants and speakers representing Spain, Portugal, France, Italy, Croatia, Slovenia, Greece and Turkey.
